PROFILE

Professional committed and persistent to achieve their goals, and with an unstoppable desire to learn and grow. I have experience in the development of applications and basic web pages and their design.

PERSONAL EXPERIENCE

Redesign of the cetav web site. As part of my graduation project of the technician in web design and development, I worked on the design and development of the new website of the technical training center CETAV. Currently I'm still working on it, since it is a graduation project, and I'm still studying the technician. I will be graduating this year
